### 4 - FIRST-AID MEASURES

**Description of first-aid measures:**

**Eye contact:**

Seek medical help. Immediately rinse the eyes with plenty of water, lifting the upper and lower eyelids from time to time. Check to see if the victim is wearing contact lenses and if so, remove them. Continue to rinse for at least 20 minutes. Chemical burns should be treated promptly by a doctor.

**Most important acute or delayed symptoms and effects:**

**Eye Contact:**

Watery eyes, redness, pain, swelling of the tissues.

### 5 - FIRE-FIGHTING MEASURES

**Suitable extinguishing media :**

Use an extinguishing agent suitable for the surrounding fire.

**Unsuitable extinguishing media :**

None known.

**Specific hazards arising from the product :**

None known.

**Special protective equipment and precautions for fire-fighters :**

In case of fire, use standard protection equipment (self-contained breathing apparatus, mask, gloves, etc.). The product is not a fire accelerator.

## 6 - ACCIDENTAL RELEASE MEASURES

### Personal precautions, protective equipment, and emergency procedures:

Do not take any action involving personal risk or in the absence of adequate training. Evacuate the area. Prevent access to unauthorized or unprotected individuals. Do not touch or walk in the spilled product. Wear protective gloves, clothing, and face protection equipment.

### Methods and materials for containment and cleaning up:

Absorb liquids with non-combustible and nontoxic absorbent and place it in a reclosable, well-identified container. Eliminate the container in accordance with local authority. Rinse affected zone with water.

## 7 - HANDLING AND STORAGE

### Precautions for safe handling:

Manipulate with care and avoid splashes. Avoid contact with eyes. Wash hands thoroughly after handling.

### Conditions for safe storage, including any incompatibilities:

Store in the original container away from sunlight, in a dry, cool, and well-ventilated area, away from incompatible substances (see Section 10), food, and drink. Separate from bases. Keep the container tightly closed when not in use. Open containers should be carefully resealed and kept upright to prevent leaks. Do not store in unlabelled containers. Use appropriate container to prevent environmental contamination. Refer to Section 10 for incompatible materials before handling or use.

## 8 - EXPOSURE CONTROLS/PERSONAL PROTECTION

### Control parameters:

#### Professional exposure limit values:

No exposure limit value known.

#### Biological exposure index:

No exposure index known.

#### Appropriate engineering controls:

Ensure sufficient ventilation to avoid exposure problems.

### Individual protection measures:

#### Respiratory protection:

Not necessary if room is well ventilated.

#### Hand protection:

Nitrile or latex glove. When handling chemicals, always wear tight-fitting gloves resistant to chemicals that comply with an approved standard. Considering the parameters indicated by the glove manufacturer, ensure that the gloves maintain their

protective properties during use. It should be noted that the breakthrough time for any material used in gloves may vary for different glove manufacturers. In the case of mixtures consisting of several substances, the duration of glove protection cannot be accurately assessed.

**Body protection:**

Personal protective equipment for the body must be suitable for the task performed and the risks involved.

**Eye/Face protection:**

Wear safety glasses with side shields.

**Hygiene measures :**

Wash hands, forearms and face thoroughly after handling chemical products, before eating, smoking and using the lavatory and at the end of the working period.
